

THRILLS of the ROARIN' GAME

Now You Know What A Rink Is

Cricket is a game played by four men—the lead, second stone, third (sometimes called the mate) and skip. The term "mate" comes from the old expression, "one man's mate is another man's player".

The lead is just what his title implies. He throws the first stone then sweeps the next skip. In his opinion he is the most important man on the rink. To the others, he is there because the game calls for four men.

The second stone attempts to knock out the rocks which by some manner of luck his opponent has placed in the house.

The third is usually a retired skip or an up and coming junior who figures he should be skip himself. He knows more than the skip and argues on each shot the skip wants to make, then skips places the broom where he wants it the minute the skip turns his back.

If the shot misses, the mate turns to the gallery with a shrug that implies the skip is stupid and didn't tell him it should have been the mate's way.

The skip never sweeps except to make a few half-hearted sweeps at a stone that appears to be a bit tight.

NOT TOO FAST!
It is customary for the new courier to take the lead or first man's position on a rink, not because it is the least important position, for it is not, but as most of the shots are "draws",

Western Canadian GOLF INSTITUTE
As a mid-Dominion school in the field of Golf, W.C.G.I. has combined modern instruction with the best of the old. Write for complete details, 18, Regina for 1934.

If You're TIRED ALL THE TIME

Everybody gets a bit run-down now and then, tired-out, lousy-headed, and maybe bothered by headaches, fatigue, nervousness, just a temporary tired condition caused by stress and strain. That's the time to take Dodd's Kidney Pills. Dodd's stimulates the kidneys, and so helps restore their normal action of removing excess acid and wastes. The pills help better, sleep better, work better. Dodd's Kidney Pills are sold in the blue box with the red hand at all drug stores. You can depend on Dodd's. 22

Patterns Pretty Pair!

A recruit was causing his sergeant a lot of trouble. Finally the NCO went up to him and said sarcastically: "Do you realize you are the only one in step?"

"Well," said the recruit, "it's no good telling me—you'd better tell the other fellows!"

"Look at the way baby is working his mouth," exclaimed Mrs. Newman. "Now he proposes to put his foot in it!"

"Well," replied her husband, "Hereditary. That's what I did when I proposed."

"I see you have a sign in your shop. We ain't to please," remarked the customer.

"Certainly," replied the shopkeeper, "That's our motto."

"Well," said the customer, "you ought to take a little time off for target practice."

His complete, easy-to-make patterns printed right in the exciting Alice Brooks Needlework Book! See 91 illustrations of your favorite needlecraft patterns—41 thrifty, useful ideas for you, your family, yourself. Send Twenty-five cents for your copy!

Funny and Otherwise

She was a good kindergarten teacher because she knew how to make the little things count.

A business man was asked to give his definition of an expert. His answer was succinct and edifying: "An expert is one who can complicate simplicity."

Edna: "You would hardly know Freddy since he got back from America. He lost all his money there and he's broke."

Joel: "I wish my wife were as broke as I am."

Joel: "I'd love to hear her say to me, 'Open your mouth.' I'm tired of her usual, 'Shut up!'"

Court clerk (in d-mittia's chair): "Now, do you swear to pull the tooth, the whole tooth, and nothing but the tooth?"

"There isn't another cook like my wife in the world. Come to think of it, though, some of the cooks I met in the army were just like her."

First ant—What's the idea all the footprints across that new box of cereal?

Second ant—Can't you read? It says "Tear along the dotted line."

The new year had preached his first sermon, and a critical member of the church, an exceedingly fat man, layd him after the service.

"Not a bad beginning, sir," he said, patronizingly. "A little too scientific and modern, perhaps, but quite fair. Remember, parson, you must feed the sheep, feed the sheep."

The victim surveyed his bulky critic and replied, "My dear man, it's exercise you need, not food."

A recruit was causing his sergeant a lot of trouble. Finally the NCO went up to him and said sarcastically: "Do you realize you are the only one in step?"

"Well," said the recruit, "it's no good telling me—you'd better tell the other fellows!"

"Look at the way baby is working his mouth," exclaimed Mrs. Newman. "Now he proposes to put his foot in it!"

"Well," replied her husband, "Hereditary. That's what I did when I proposed."

"I see you have a sign in your shop. We ain't to please," remarked the customer.

"Certainly," replied the shopkeeper, "That's our motto."

"Well," said the customer, "you ought to take a little time off for target practice."

Princess Margaret To Get Own Home

LONDON.—Princess Margaret, 22, was disclosed to be planning a new "home" with a private entrance.

It is a small apartment being made for her out of the old nursery at Clarence House. Queen Elizabeth and Prince Philip lived there before the death of King George VI.

The flat will have several spacious rooms overlooking Pall Mall, a tiled bathroom and a small kitchen. It will have a separate entrance by elevator from a side door.

The apartment should be finished by the time the Royal Family comes back from Sandringham, informants said.

The word "daily" originated from the name of a London paper of the 18th century. 3024

Publishers Form A Newspaper Co-operative

These men are directors of the Prairie Publishers Co-operative Ltd., the first newspaper co-operative of its kind in Canada. The directors, named at a meeting in Regina recently, are all publishers of Western weekly newspapers, and will govern the operation of a ready-print plant which they purchased from the Toronto Type Foundry Co. at Regina. Left to right: Sterling King, Estevan (Sask.); McCreary, A. W., Hanks, president, St. James (Man.); Leader, H. G., Thund, Viking (Alta.); John Vopni, vice-president, Davidson (Sask.); Walter Ashfield, Grenfell (Sask.); Sam. Missing from the picture is director Bert McKay, Moosemin (Sask.); World-reporter, G. H. Sims in management at Regina. Miss Esther Heyn, treasurer; Miss Joan P. O'Donnell, secretary.

Alberta Has Set New High Record With Wheat Crop

LETHBRIDGE, Alta.,—Southern Alberta production of new wheat in 1932 reached an all-time high, \$173,400,000 in the area served by the C.P.R. Lethbridge division.

This was an increase of \$44,000,000 over 1931 and \$23,500,000 higher than the previous record in 1926, a bumper crop year.

The big item, as usual, was wheat which produced \$81,800,000. The biggest increases were shown in other grains and in hay and feed.

Both these categories showed a boom of 50 per cent. The "other grains" totalled \$27,200,000 and hay and feed at \$64,000,000.

There was only one decrease—cattle and horses. This industry was plagued by the foot-and-mouth disease in Saskatchewan. Production value was down almost \$5,000,000 at \$17,450,000.

The wheat crop at a 25.5-bushel acre average amounted to 56,300,000 bushels. The coarse grain, rye and flax crop ran 29,720,000 bushels in 1932.

ANIMAL EXCHANGE
CALGARY.—The Calgary zoo is helping the Moose Jaw wild animal park to build a bigger and better collection. In addition to three monkeys, the Calgary zoo planned to ship a female leopard. In turn, Calgary got a raccoon, horned owls and rare hawks recently.

GEORGE H. SLOAN, who has been appointed manager of the Prairie Publishers Co-operative Ltd., formerly managed the Ready-Print service for the Toronto Type Foundry Company.

University Training For Student Nurses

SASKATOON, Sask.—University training on a mass basis for student nurses is being introduced here for the first time in North America.

The program, sponsored by the Saskatchewan Government, seeks to improve the standards of instruction in the basic sciences for student nurses.

It will help relieve a teacher shortage in Saskatchewan nursing schools, will bring together students from all parts of the province and will make the full resources of a university available to them.

The nurses will spend six weeks at the University of Saskatchewan at Regina College. The program is separate from the five-year nursing degree course offered by the Saskatchewan university.

Prof. Hazel B. Keeler, director of the university school of nursing, will co-ordinate the provincial program. University lecturers will give instruction, and the laboratories, library and classrooms, as well as other university facilities, will be available to the students.

A nursing science class is being evolved to assemble in usable form scientific facts and principles related to nursing technique and procedure.

As a result of the course, nurses will receive wider and more representative training in subjects such as sociology, mental hygiene, microbiology and anatomy.

The program has been approved for an experimental period of five years, with initial planning to cover the first three years.

A rainbow is due to the bending and reflection of the sun's rays when they are shining on raindrops in the sky.

Airport Base Is Opening Up Isolated Area

COLD LAKE, Alta.—Huge sums of money are being spent in this formerly isolated area of northwestern Alberta, 180 miles northeast of Edmonton.

Cold Lake has been chosen by the defence department as the base for a new \$20,000,000 airport and bombing and rocket range which will straddle the Alberta-Saskatchewan boundary.

Hundreds of people are moving in to take advantage of the district's new-found prosperity.

New hotels and hundreds of homes have been built and the Canadian National Railway are pushing a line into Cold Lake. An all-weather road has been completed and ample electric power is available.

The airport, five miles from the town, will include one of the largest hangars in Western Canada. Tenders estimated at \$10,000,000 have been called for construction of 21 other buildings. They will house staff and residents indefinitely estimated at between 3,000 and 4,000 persons.

LARGEST TURBINE
VANCOUVER.—Believed the largest hydraulic turbine in the world, a turbine capable of generating 150,000 horsepower was built here for the Kitimat aluminum project.

The turbine will ultimately serve other industries in the area. The builders say one steel section, weighing 31 tons, is the largest cast ever made in Western Canada.

COULD GET PLACES
ROCKY MOUNTAIN HOUSE, Alta.—A pig with seven feet was bought to market by a farmer from the vicinity of Rocky Mountain House.

The pig had seven feet, but the usual four legs, but there were two feet each on the front legs and on one of the rear legs. The pig appeared healthy in every respect.

I.O.D.E. BURSARIES
WINNIPEG.—The Imperial Order Daughters of the Empire will award 11 bursaries worth \$1,000 each this year to children of deceased or disabled armed forces personnel. One bursary will be awarded in each province and one in the Yukon.

Fishing rod and contented smile are evidence of Jim McRae's sincerity when he tells Canadians to look to their parklands when planning this year's summer vacation. He is featured every Tuesday night on CBC Trans Canada's "Here's a Holiday" show, a happy-go-lucky half hour of fine musical entertainment along with information on Canada's vacation spots.

Make Your House Belong

Tie down your house and buildings with foundation plantings, suggests P. D. McCalla, supervisor of horticulture, Alberta Department of Agriculture. Foundation plantings are the well placed shrubs and other plants that merge the buildings into the landscape and help to make them part of the picture. The foundation planting should not detract from the house nor the house detract from the planting. They should go together. That is why modern landscape planners do not like large beds of brilliantly colored flowers near the house. Color is excellent if used with judgement, but it should not detract from other appealing features of the home surroundings. Judicious planting can make a surprising difference to the appearance of a house. A tall house, for example, brought down to earth by planting shrubs a little way from the corners. The line of vision then follows a gentle slope from the shrubs to the roof corner instead of following abruptly the perpendicular rise of the wall. With the lower type of house, close corner plantings will help to avoid a depressed appearance, don't over crowd, even small shrubs should be four or five feet apart. Good ideas for plantings can be obtained from observation of other well planned home grounds, but the owner must use his own discretion as to type and placing of material. Shrubs vary considerably in color, size, shape and texture offering a wide choice and an excellent opportunity for individuality and initiative. A useful list of trees and shrubs grouped according to height can be found in the Alberta Horticultural Guide obtainable from district agriculturists or from the Extension Service Alberta from the Department of Agriculture, Edmonton. Another worthwhile publication from the same source is a list of prairie nurseries from which suitable plant material can be purchased.

Poison ivy, one of the most toxic members of the sumac family, grows wild in all provinces of Canada, except Saskatchewan and Alberta.

The Detroit river which runs by Windsor, Ont., and Detroit, carries an average of 115,000,000 tons of shipping a year, greater tonnage than that of Suez, Panama and Kiel canals combined.

Canada's fine paper mills, unlike the "one product" newspaper mill, are called upon to produce a very wide range of papers requiring great skill and versatility.

Canada's Eskimos are divided into cultural groups—the Eskimos of the Eastern Arctic and the Caribou People.

"... very beneficial
to our firm"

Recently the owners of a new business wrote their bank about the way the local branch had helped:

"Having completed our first year in business, and one which we feel has been most successful, we would like to advise you of the splendid co-operation we have received from the officials of your branch. We have consulted your local manager many times, not only regarding financial problems but business problems in general, and his advice has been very beneficial to our firm."

Such service is part of the job of every manager of Canada's 3700 branch banks. He must know the problems of the people he serves—whether business men or primary producers, wage earners or salaried workers. He welcomes every opportunity to make his bank useful to them—and to you.

HERE AND THERE

about eight inches of snow as the weather has been clear.

Mr. and Mrs. Raymond Menard and children of Grand Prairie arrived

in town early Saturday morning to spend a few days visiting relatives and friends.

Mr. and Mrs. A. Plante and Mr. and Mrs. R. Clifford went to Calgary Saturday to witness the playoff to determine the champion curlers of Alberta. Upon their return they ex-

pressed the opinion the champion curlers were no better than the Gleichen curlers.

Mrs. Wm. Schmidt returned last week from a visit to friends and relatives in California. Mrs. Schmidt says she had a wonderful trip.

A leak in the water pipes that could not be found was finally located in the basement of the telephone office. The leak was thought to be coming from a main and ran for several

months. Filling up the town drainage ditch with ice and water. One evening a man fell into this ditch and had considerable trouble getting out. Out side of an ice cold bath he was none the worse for his involuntary dip.

Mrs. E. Woods and son Leo spent Saturday in Calgary attending attending a farewell party for Lawrence Woods and family who are leaving shortly to reside in California.

University attendance in Canada has increased by 175 percent in the last 32 years, while during the same period the population in the age group 18 to 24, which includes most college entrants, has increased by only 45 percent. High school attendance has also increased by 150 percent during the same period, while the age group 13 to 17 had increased by only 29 percent. A survey of 417 Canadian firms now employing some 15,000 perfonally trained persons and whose total employment represented almost 14 percent of all wage and salary workers in Canada revealed probable demands for university trained persons over the next four years. The consensus of the firms covered is that the supply of graduates, particularly engineers, will not keep pace with the growth of industry, if the present levels of hirings and university enrolments continue. It was expected that substantial numbers of chemists, physicists and geologists will be required by 1956.

The per diem system under which roads compensate one another for use of freight cars reached its 50th birthday last year.

DESCRIBING CANADA OVER A CENTURY AGO

Canada is described as a country 700 miles in length and 200 miles in width in a copy of Barclay's dictionary printed prior to 1820. Pointed comment on the English bulldog and gaming cock is contained in the dictionary which also embraces many other bits of information amusing in the light of modern days.

The complete reference to Canada in the dictionary is as follows: Canada: A country of North America, north of the United States, extending about 700 miles in length from northeast to southwest and about 200 in breadth. It is subject to Great Britain; and the religious establishment is that of the Church of Rome. By an act of Parliament in 1791, the country was divided into Upper Canada of which Montreal is the capital; and Lower Canada, of which Quebec is the chief city; and a constitution, partly resembling that of England, was given to each of these provinces. The winter here for six months is very severe; the cleared lands are very fertile, and the vegetation various, and corn ripens in two months time. Vegetation being always wonderfully accelerated where the season is short. Furs and skins are obtained here in great quantities. The Canadian merchants having of late years, interfered greatly even with the Hudson's Bay Company exploring numerous nations inland and sending many large canoes into the interior country. The rivers lakes and bays, are numerous, large and deep, and well supplied with fish. Here are several ancient and expansive forests and the tribes of Indians are numerous.

Amusing sentences in the two columns of information about England are as follows: There is one sort of dog that is not to be equalled in any part of the world, which is the bulldog; for these will not only attack the fiercest bull, but any kind of wild beast or anything; when they have once fastened upon the animal nothing will oblige them to let go of their hold. But what is more strange, when any of them are transported beyond the sea they lose their courage, and the same is said of English cocks. It must however, be confessed that the use is made of the courage of these creatures, especially the latter by men who from whose rank and talents better things might be expected, undeservedly fix a stigma on the national character.

Money in Economy

Classified Want Ads are an economical and effective method of reaching the buying public. Your advertisement is not in vain. It will return large dividends.

CLASSIFIED ADS

A PERMANENT BUSINESS, part time or full, is limited number of sales result from a single advertisement for America's largest nationally sold LIQUID FERTILIZER. Steady \$50 and up weekly income. Write "No-Churn" Plant Food, Box 84, London, Canada.

QUESTIONS AND ANSWERS

about Cancer

QUESTION: Does cancer come from a single bruise? ANSWER: A type of bone cancer may sometimes result from a single severe injury. It is believed that a single injury to soft tissue such as the breast, will not cause cancer to develop. Know Cancer's Danger Signals—Send for free literature by writing: CANADIAN CANCER SOCIETY, 101 - 7th Ave. E., Calgary, Alberta.

GMC IN THE 1953 TRUCK SPOTLIGHT

Now, even more than ever, the spotlight's on GMC!

For 1953, GMC trucks bring you new styling power and new safety with heavier, more rigid and durable construction. All 1953 GMC models provide increased horsepower and higher compression ratio. These great valve-in-head engines give you faster acceleration, greater hill-climbing ability—and even greater economy than ever before!

Model for model, feature for feature, these 1953 GMC trucks are the greatest GMC trucks ever built. And with all their solid appeal, only they give you real dollar for dollar "Gut".

Drop in to see them and talk over your needs. Let us show you how GMC trucks give you more of what you want in 1953.

WITH GREAT NEW VALUES . . .

In Power . . . Three husky, improved valve-in-head engines, new high compression ratios, highlight the GMC power story for '53. Choose the power plant you need from the rugged 108 h.p. Loadmaster, 125 h.p. Torquemaster and 130 h.p. Workmaster engines.

In Performance . . . Over the road and over the rough, GMC can handle the roughest jobs with ease and come back for more. With heavier, stronger, more durable frames, these husky 1953 GMC trucks are the sturdiest, most rugged ever built.

In Safety . . . For fast, smooth positive stops all 1953 GMC trucks up to the 9400 series are now equipped both front and

rear with big, husky "Torque-Action" brakes which utilize the motion of the truck itself for extra stopping power. Heavy duty models in Series 9100, 9500, 9700 and 9800 have extra-large "Torque-Action" on the front wheels and famous "Twin-Action" brakes at the rear.

In Economy . . . The big improvements in GMC's thrifty, valve-in-head engines combine with the new, rugged stamina to bring you overall operating economy like you've never seen before. Ton for ton, mile after mile, all year 'round you save money with GMC.
